

# Automated Detection of Median Momentum Transitions

## Hysteresis with Noise-Signal Significance Filtering

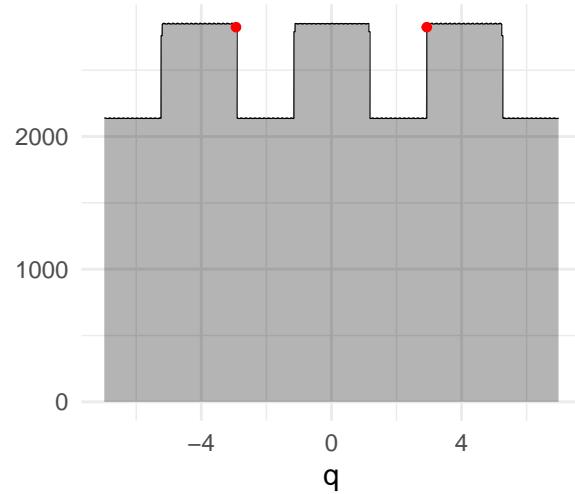

Transition 1 at  $P = 1.00$

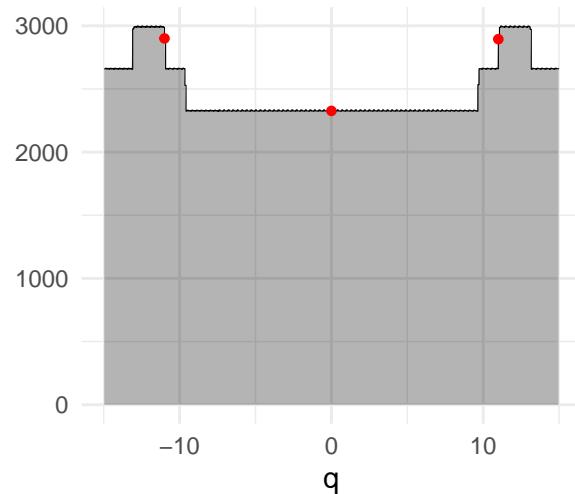

Transition 2 at  $P = 3.00$

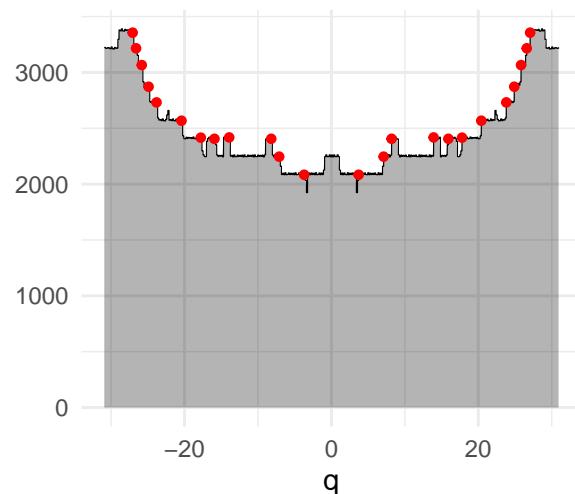

Transition 3 at  $P = 7.00$

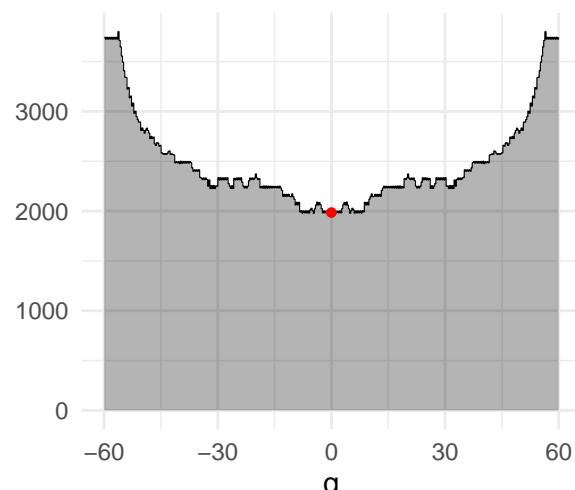

Transition 4 at  $P = 15.00$

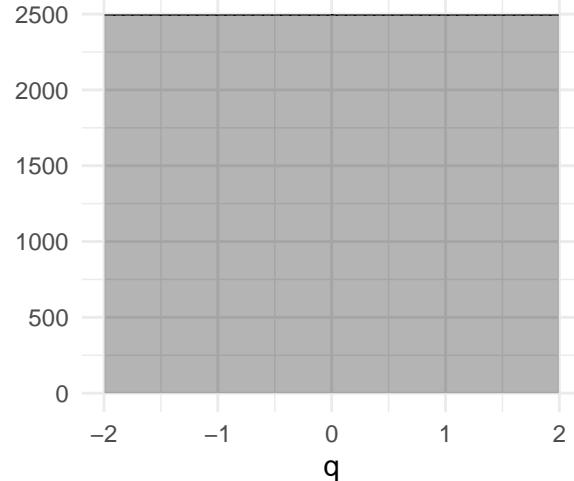

Transition 5 at  $P = 31.00$

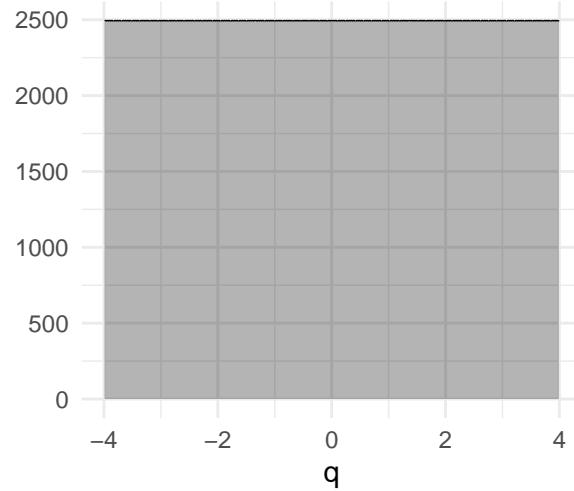

Transition 6 at  $P = 60.10$

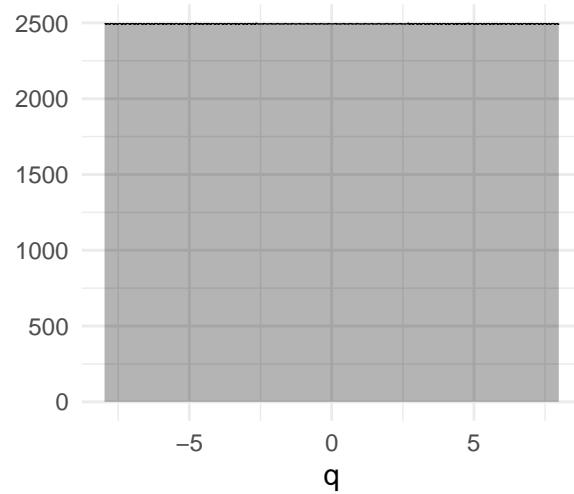

Transition 1 at  $P = 2.00$

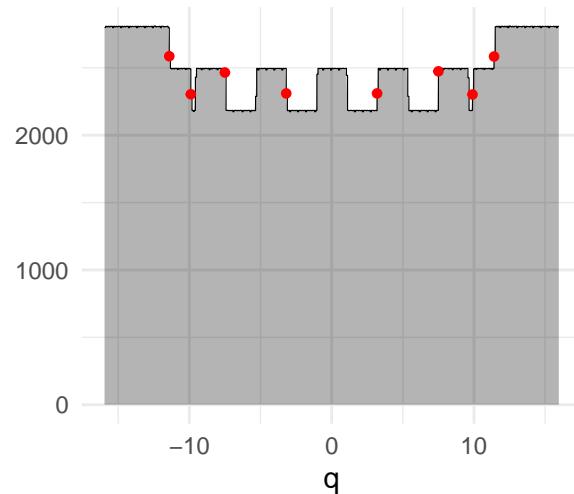

Transition 2 at  $P = 4.00$

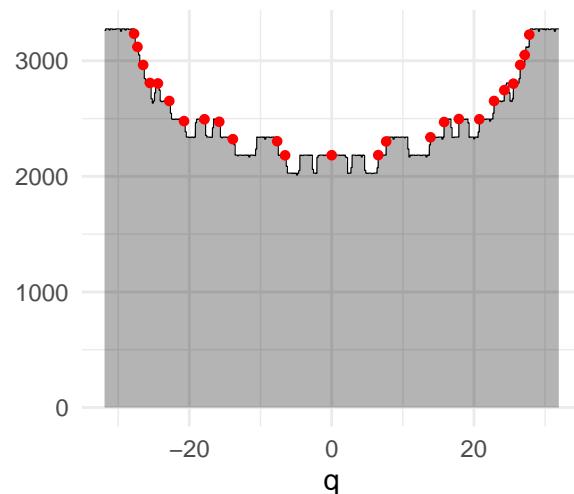

Transition 3 at  $P = 8.00$

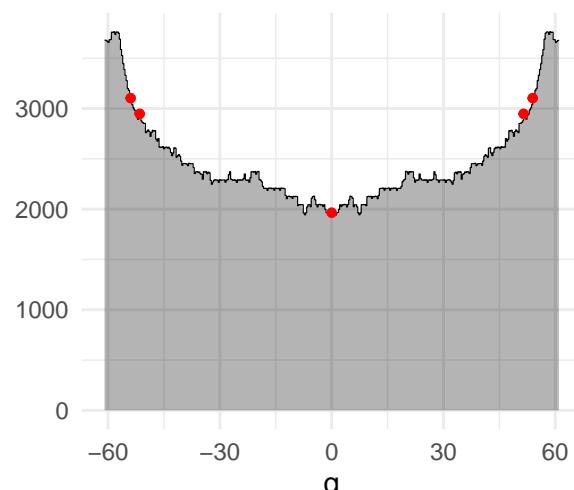

Transition 4 at  $P = 16.00$

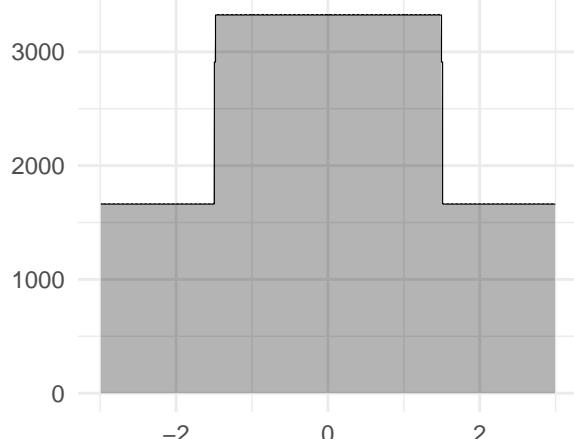

Transition 5 at  $P = 32.00$

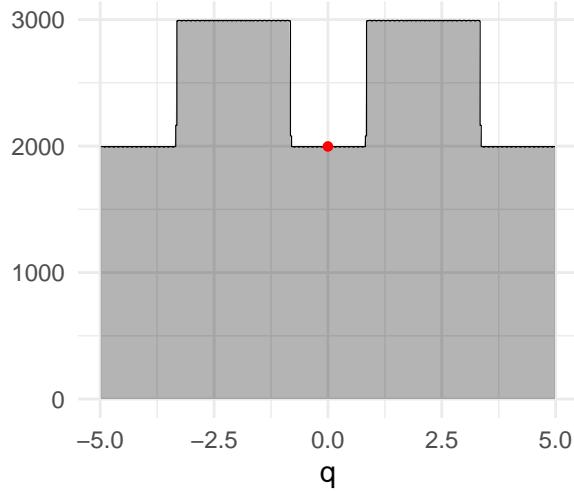

Transition 6 at  $P = 61.10$

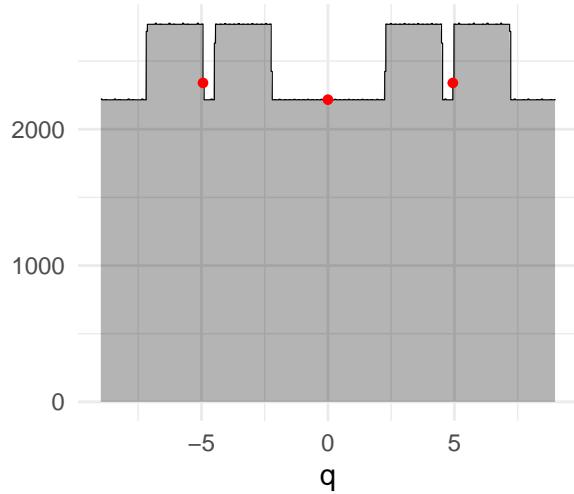

Transition 1 at  $P = 3.00$

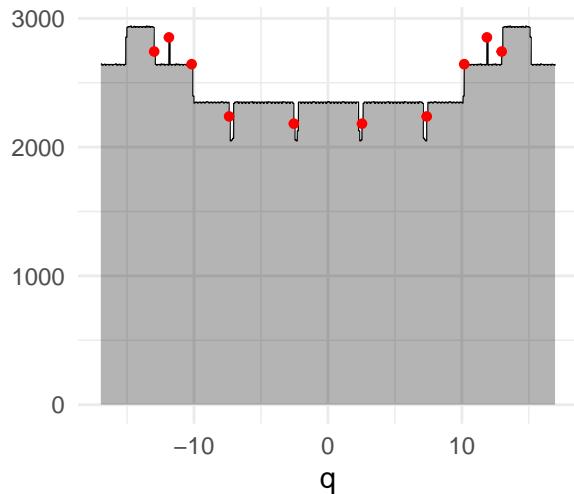

Transition 2 at  $P = 5.00$

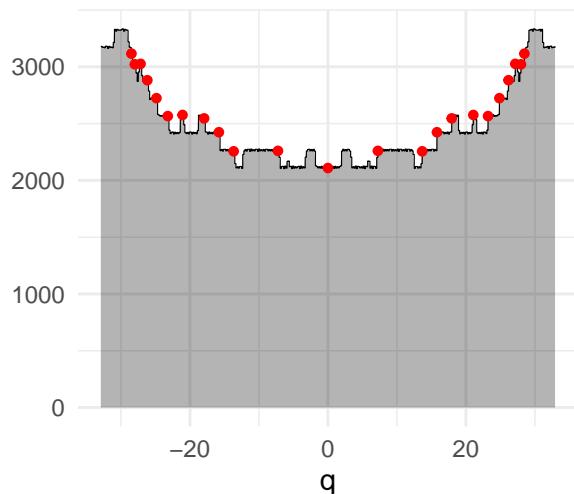

Transition 3 at  $P = 9.00$

Transition 4 at  $P = 17.00$

Transition 5 at  $P = 33.00$

Transition 6 at  $P = 62.10$
