Landauer Energy vs. Normalized Momentum P

Holographic Projection: $E \sim \sqrt{P}$ ($k = 0.859$, $R^2 = 0.9883$)

Landauer Energy $k_B T \ln 2$

Normalized Momentum $p/\sqrt{(mh\omega)/2\pi}$

Series — Holographic Theory — Mean — Median

Residual

Normalized Momentum $p/\sqrt{(mh\omega)/2\pi}$
